

RS Clare & Co Ltd

Innovation since 1748

RS CLARE IS A LEADING MANUFACTURER AND INNOVATOR OF SPECIALIST LUBRICANTS AND SURFACE COATINGS, SUPPLYING INTO A RANGE OF INDUSTRIES WORLDWIDE.

RS Clare & Co Ltd was founded in Liverpool in 1748 by Richard S Clare at the start of the Industrial Revolution. We are the longest established company manufacturing lubricants in the UK. Our origins lay in the distillation of turpentine, and ‘paint, oil and colour’ became our business. During the 19th and 20th Centuries we distilled tar, invented road markings, pioneered the application of cationic slurry seal and began manufacturing lubricating greases for major oil companies.

Today RS Clare operates in multiple industries and is a truly global enterprise. Our Industrial Lubricants Division has built on our long experience in grease making by carving out niche markets for speciality products in Oil & Gas, Rail, Steel, Marine and Automotive Industries throughout the world. We also operate a Surface Coatings Division, making and applying anti-skid surfaces and road markings. We continue to manufacture lubricants under customers’ own brands as part of our Industrial Division.

“ The ‘Pursuit of Excellence’ is as important today as when my chemist grandfather used it in our sales literature back in the early 1900s. ”

Ian Meadows, Chairman 2016

INNOVATION SINCE SEVENTEEN FORTY EIGHT

YEARS OF INNOVATION AND AGILITY, UNDERSTANDING
OUR CUSTOMERS AND THE CHALLENGES THEY FACE

5

RS Clare are no longer just the manufacturer of products, we're the innovators too. We work with our customers to understand their business, we listen to their problems, become experts in the field and then we work to develop a solution. We have an extensive Research & Development team who focus on specific industries where our insight and expertise in tribology can really make a difference. Our customers include some of the largest blue chip companies globally, and we operate as an extension to their supply chains.

To help drive the business forward, RS Clare has recently made a significant investment in a purpose built factory and office suite integrated into our existing head office in Liverpool. The new facilities not only enable our continued growth

and expansion for years to come, they are a symbol of our commitment to the environment. With 78 Solar PV panels, ground source heating and a rainwater harvesting system, our new facilities are in line with our strategic approach to environmentally sustainable lubrication practices.

After nearly 270 years in business we are thriving, and we are doing so because our customers demand the very best from us, and because we continue to anticipate change. Our longevity is based upon our ability to be innovative and dynamic, and we constantly pursue new ways to improve the services and products that we offer. We are very proud of our history, but at the same time we recognise that it's the future that really matters.

OUR MISSION IS TO DEVELOP INNOVATIVE, PROBLEM SOLVING PRODUCTS THAT OFFER LONG-TERM COST SAVINGS FOR OUR CUSTOMERS.

OIL & GAS

RS Clare are manufacturers of advanced lubricants and sealants for Oil & Gas valves across the world. We are recognised as world leaders in the valve lubrication industry and are suppliers of choice to major Oil & Gas companies. Our lubricants play a crucial role in maintaining valve integrity, increasing reliability and reducing maintenance costs.

Our premium valve lubricants are completely resistant to hydrocarbons so that even in the most aggressive environments, valves are protected and integrity is maintained. This allows operators to increase re-greasing intervals and reduce the number of valve repairs, resulting in much lower operational costs and fewer production shut-downs. In RS Clare's Valve Lubricant 601, we have the only single valve lubricant that is approved by 6 major global valve manufacturers.

RAIL

Our advanced formula greases are first choice for rail operators in the UK and for international customers who want to extend track life, reduce downtime and protect the environment. RS Clare is constantly innovating to develop new products to suit the ever-increasing challenges faced by the rail industry in the 21st century.

Our EcoCurve Range employs a unique technology that gives market-leading stability across a wide range of temperatures. This means that for the first time rail engineers can use one grease grade across all seasons. These advanced products extend the life of curved rails, and through the use of renewable and biodegradable raw materials, help to significantly reduce the carbon footprint of rail maintenance operations around the world. The range is recognized through the prestigious European Ecolabel certification scheme.

OUR FOCUS IS ON PRODUCTS THAT CREATE LIFETIME VALUE

ENHANCED PERFORMANCE IS VITAL AND
ULTIMATELY SAVES OUR CUSTOMERS MONEY

7

MARINE

RS Clare offers a world class range of innovative greases to protect vessel equipment in extreme conditions. Our marine lubricants are resistant to salt water, humidity, variations in temperature and high shock loads. The BioMarine range is VGP (Vessel General Permit) compliant and carries the European Ecolabel, meaning there is minimal impact on the sensitive marine environment, but without compromising on performance.

In our Bimagrip product, we have the world leading safe surfacing solution for the ramps of PCTCs (PureCar/Truck Carriers) and RoRo (Roll-On/Roll-Off) vessels. Bimagrip provides the safest, most efficient solution for loading and discharging vehicles, even in wet conditions.

HIGHWAYS & BRIDGES

Our thermoplastic road markings and anti-skid Bimagrip surfacing combine to create a safer more stable environment for drivers around the world. RS Clare developed the first true thermoplastic

road marking material back in the 1930s and we continue to manufacture a full range of products to this day. Bimagrip has been applied to bridges worldwide, increasing safety for pedestrians, cyclists and drivers for nearly two decades. At the forefront of road safety, our objective is to supply quality products that reduce the number of accidents on our roads.

INDUSTRIAL

Researched, developed and refined for a wide range of customised industrial applications, RS Clare lubricants are engineered to maximise asset lifetime and minimise maintenance. We offer lubricants in a wide range of industries such as Automotive and Steel and also work closely with our clients to develop bespoke private label greases for their range.

PEOPLE PARTNERSHIP PROGRESS

OUR PEOPLE ARE AT THE HEART OF OUR BUSINESS,
OUR CUSTOMERS ARE OUR PARTNERS AND
TOGETHER, WE AIM TO MAKE MUTUAL PROGRESS.

The pursuit of excellence in all that we do is what motivates our team, and we have won award after award in recent years for innovation, sustainability and international trade. Sound finance, world class R&D, commitment to our customers and highly skilled people are all co-ordinated in pursuit of our goals. If there's one quality to which we owe our success it has to be our commitment to innovation and excellence in everything we manufacture and everything we do.

At RS Clare we strive to create an environment and culture that inspires and empowers staff to do the best for our customers. We believe that happy staff means happy customers, and good service is good business.

“ Expertise, focus, commitment, our power is in our people. ”
