# THE WHOLE PACKAGE

## GREASE INJECTION EQUIPMENT

RS Clare's premium valve lubricants are adhesive, viscous greases designed for severe operational service conditions. In conjunction with partners, we have developed a streamlined range of high pressure pump equipment suited to handling our heavy duty products. These pumps not only have exceptionally high pressure and flow rates, they also come with bespoke stroke counters to accurately monitor and record how much grease is being injected in the valve.

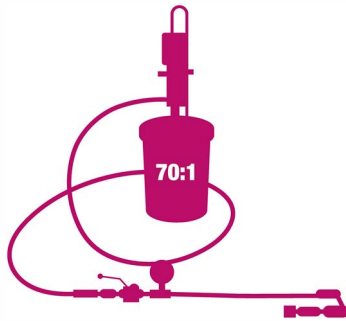

## PUMP EQUIPMENT FOR VALVE LUBRICANTS, SEALANTS & CLEANERS

RS Clare, in conjunction with partners, has developed a streamlined range of high pressure pump equipment suited to handling our heavy duty valve lubricants and sealants. Often, after such products are selected, what can impede or stop the job is not having a pump system with sufficient capability to inject these products into the valve.

We have also developed bespoke stroke counters for their pneumatic pump systems, which allow the Operator to accurately monitor and record how much grease is being injected into the valve. Too little grease, and the valve will not be properly lubricated and protected; too much grease and the excess will exude down the flow line or down the tubing, both of which are undesirable situations.

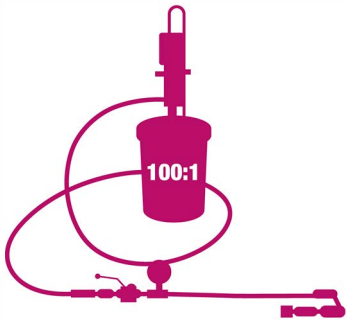

# EXPLORE OUR RANGE OF PUMP EQUIPMENT

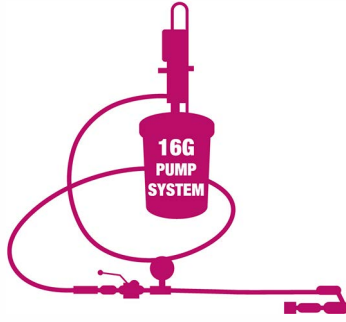

## RS Clare 70:1 Pump Systems

For use with Valve Lubricant 601™ the RS Clare 70:1 Pump System is compatible with 12.5kg and 18kg European specification pails, a system is also available for US 5 gallon specification pails.

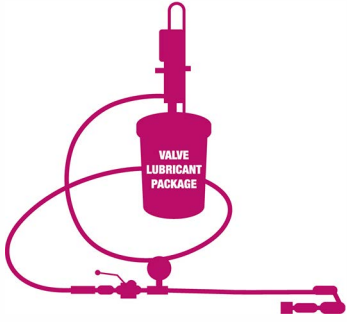

## RS Clare 100:1 Pump System

Suitable for pumping viscous heavy duty valve lubricants and sealants at high flow rates, the system is compatible for use with European specification 18kg and US specification 5 gallon pails

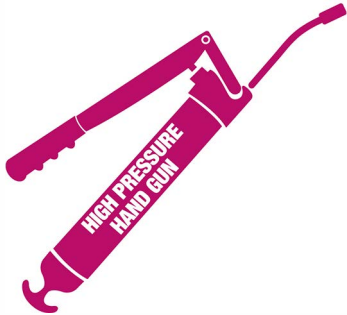

## 16G Heavy Duty Pump System

An extremely robust and low maintenance pump system specifically for use with 16 Gallon/120-130lb/50-70kg drums. Suitable for pumping very viscous lubricants and sealants at high flow rates.

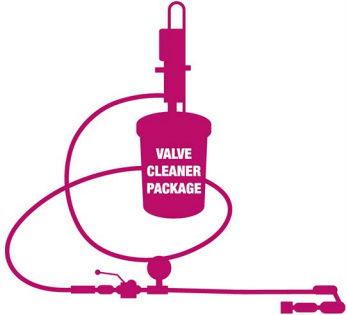

## Valve Lubricant Bucket Pump Package

This manual bucket pump system is hand operated and suitable for pumping Valve Lubricant 601™. The hose end assembly is 5,000 psi rated and includes a safe-vent coupler rated to 10,000 psi,

## High Pressure Hand Gun

Our heavy duty hand-held injection gun is configured for RS Clare valve lubricant or sealant cartridge packs (0.45kg size) and can develop pressure to 15,000 psi as and when required. Provides 20 or more strokes without re-priming.

## Valve Cleaner Bucket Pump Package

Ideal for injecting 601 Valve Cleaner up to 5,000 psi, our Valve Cleaner Bucket Pump Package is a heavy duty manual bucket pump solution for oils and fluids, with a reservoir capacity of approximately 15 litres.
